Tri-Fold Display Board Layout

Plan your board here first, then copy it onto the real thing. Panels are to scale with a 36" x 48" board.

QUESTION

What did you want to find out?

HYPOTHESIS

If ___, then ___, because ___.

RESEARCH

3 facts you learned

PROJECT TITLE

Big, bold, readable from 6 feet away

DATA & GRAPHS

Bar or line graph + table of trials

PHOTOS

Experiment in action (tape here)

MATERIALS & STEPS

List + numbered steps

RESULTS

What happened? Numbers!

CONCLUSION

Was your hypothesis right? Why?

Board Tips That Judges Notice

Quick wins for a last-minute board

1. Title: 2-4 inch letters. Use a short, catchy question as the title.
2. Font: print headings at 48pt+, body text at 18pt+. Nothing handwritten if you can help it.
3. Color: pick 2 colors and stick to them. Mount white printouts on colored paper.
4. Graphs: label both axes and include units. One clear graph beats three messy ones.
5. Photos: show YOU doing the experiment. Judges love proof.
6. Flow: people read left to right, top to bottom. Follow the panel order on page 1.
7. Check the rubric: every school is different. Your teacher's rules win.
8. Bring: tape, glue sticks, scissors, and extra printouts on fair day.
